As a full-stack developer, my passion for technology drives me to constantly learn and improve my skills. From crafting efficient and salable backed systems to designing and implementing user-friendly interfaces, I thrive on solving complex problems and creating elegant solutions.

Skills

Advance

- Nodejs
- Nestjs
- Javascript/ Typescript
- Express/REST
- Graphql
- MongoDB/Mongoose
- MySql
- Redis
- Reactjs
- Vuejs
- Hooks/Redux
- GIT
- HTML/CSS

Intermediate

- AWS services(s3/ses)
- Google Cloud Engine
- Python
- Nextjs
- Socket.io
- Docker
- CI/CD
- Jest/Mocha

Experience

DEC 2021 – MARCH 2023

Software Engineer / EBpearls, Lalitpur

- Developed and maintained applications using nestjs, nodejs, typescript, graphql, mongodb and reactjs.
- Optimized existing codes to increase software performance and scalability.
- Oversee a team of three software developers as a project lead with daily discussions to brainstorm ideas in software development and tracking changes made in existing programs.
- Code reviewing and presenting timely reports to management regarding developments and effectiveness required for efficient and scalable system.
- Worked on project structure, collaborated with team for better architecture in order to build efficient and smooth application.
- Involved in product team of the company and built theme project to help developers for better development efficiency.

JAN 2019 – DEC 2021
Software Engineer / Proshore Nepal, Kathmandu

- Developed and maintained backend projects using nodejs, javascript, and MySql and frontend application using stacks like reactjs, Angular.js that stayed up with challenging technology.
- Analyzed client/user requirements and managed quality documentation in order to reach win-win solution to every confusing requirements which led to build efficient and user convenient application.
- Collaborated with team of software engineers, worked on timely reports to executive management regarding current developments, implementation of competitive technical stacks, scalability and maintainability of a system.
- Implemented unit testing to determine software effectiveness and mend broken links or glitches in the system.

Education

2016- 2020
Bachelors in Computer Science and Information Technology / Maadhan Bhandari Memorial Collage | Tribhuwan University
COMPLETED MINOR AND MAJOR PROJECTS IN ADVANCED JOB SEARCH

PROJECTS

websocket_chatapp
Created a minor project using **socket.io** and **node.js** for a collage and conducted a knowledge sharing session for real-time application.

jobs-for-skills
Created a real-time job search web application using **Node.js, React.js**, **MySql**, **Python** as a final year project using Multinomial Naive Bayes algorithm.

Activities

- Worked as a project lead at EB pearls which helped to get confidence on my leadership skills.
- Like to read technical blogs, good books, learn guitar, hiking and trekking in my free time.
